- Police Act*, Police Service Regulation, or Police Conduct and Oversight Regulation
- Obligation under Commission policy
- Report on program or update on progress
- Response to Motion
- Other:

**Recommendations**

Accept the 2025 crime report for information and discussion.

**Background / Analysis / Considerations / Next Steps**

The Calgary Police Service provides annual reporting on crime and call for service trending. This report shows increases in violence and slight increases in property crimes as well as the CPS' continued focus on frontline proactive work.

This type of reporting helps to identify emerging issues, support our data driven strategies, programs, and practices. It is also used to inform the strategic direction for budget and operational decisions.

# ANNUAL STATISTICAL CRIME REPORT-2025

Prepared by  
Corporate Data & Analytics

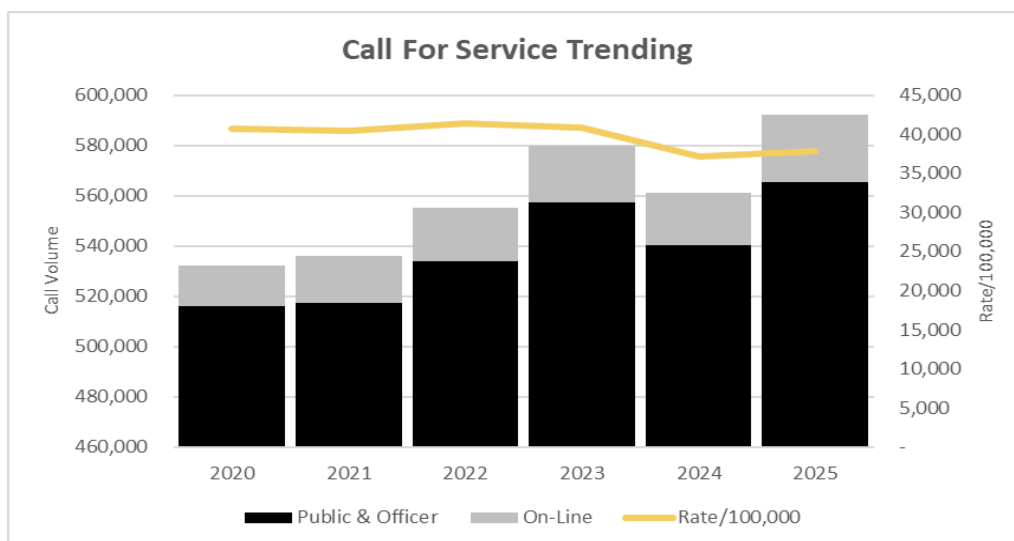

## Executive Summary <sup>1 2</sup>

This report provides a statistical summary of Calgary's call and crime trends. Given Calgary's population growth, both call and crime volume, as well as call and crime rates (numbers per 100,000 Calgarians) are presented in this report. Key findings for 2025 are:

- Increases in officer-generated proactive calls for service can off-set public calls for service, where police proactively intervene and/or prevent issues.
- Violent crimes, particularly assaults, continue to increase in both volume and rate. The severity of these crimes is also trending up.
- Both domestic violence and domestic incidents that do not meet the criminal threshold are increasing.
- Property crimes are still lower than pre-Covid levels but are showing slight increases.

## Calls for Service <sup>3</sup>

The volume of demand for police has surpassed pre-Covid levels. In 2025 there was a 5% (n=~25,000) increase compared to 2024 and 6% (n=~32,000) increase in calls for service (CFS) compared to the five-year average. While publicly generated CFS account for 63% of all requests, on-line reporting has doubled in the last five years. Increases in officer generated CFS (proactive work) often offsets the public CFS as officers pre-emptively intervene in a situation and/or prevent an incident from occurring. The overall rate of CFS has remained relatively stable.

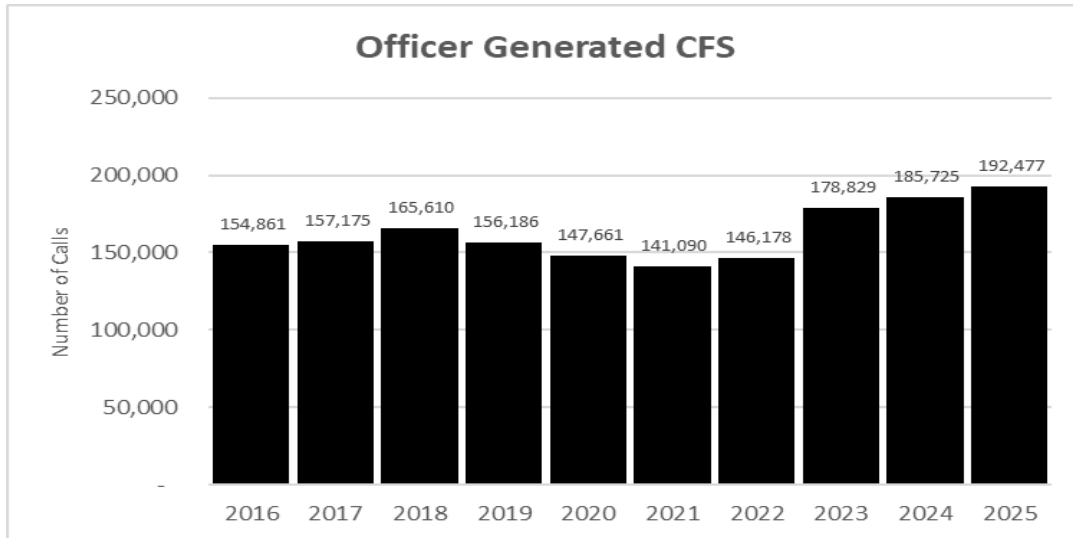

<sup>1</sup> Source: CPS Quarterly Reports. Level of count is Most Serious violation. The statistics may vary due to late reporting/processing. The statistics do NOT align with the public facing dashboard as it is a different level of count.

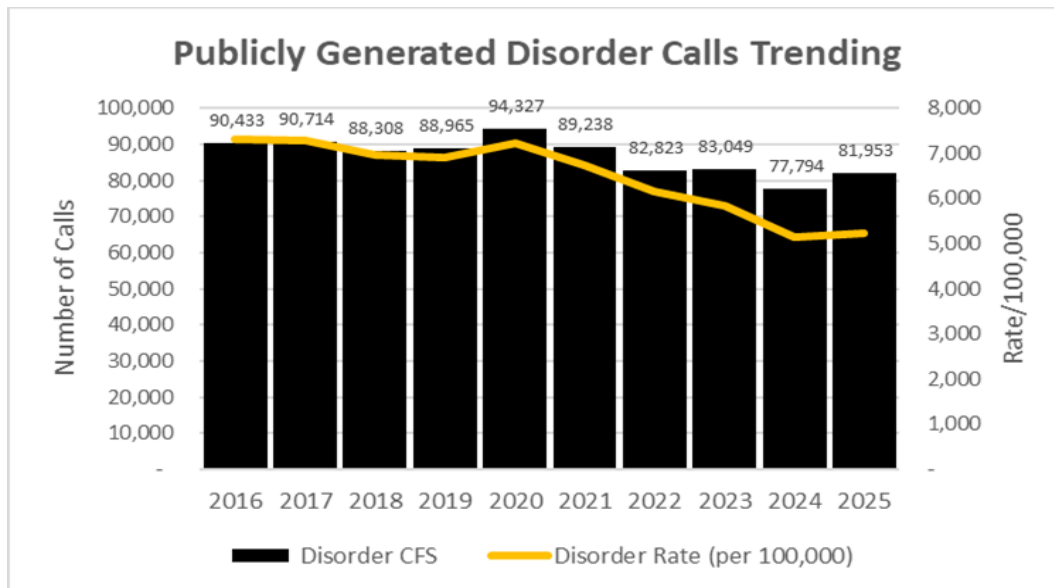

<sup>2</sup> Population statistics are sourced from Calgary & Region Population Projections 2025-2030 January 2025 Update, Paapa Essel, Corporate Economist, City of Calgary

<sup>3</sup> Technically, Coplogix is not a call for service; rather it represents a report that could have been a CFS but was submitted online.

There has been a focus on increasing proactive work by officers. The officer generated CFS have increased by 4% (n=6,752) in 2025 compared to 2024, and 16% (n=6,288) compared to the five-year average. These calls include the work areas dedicated to proactive work such as the Community Engagement Response Teams.

Disorder calls for service are typically not crimes but are nevertheless situations that make Calgarians feel unsafe. In 2025, there was a 5% (n=3,799) increase in calls compared to 2024 but decreased by 4% (3,493) compared to the five-year average. Consistently, disorder is driven by calls relating to unwanted guests, suspicious persons, and disturbances. The rate of disorder over the last ten years has decreased from 4,132 calls per 100,000 in 2016 to 3,328 in 2025.

### Violence <sup>4</sup>

The volume of violent crimes continues to increase; 2025 shows a 4% increase over 2024 (n=603 victims) and a 16% (n=2,356 victims) increase over the five-year average. In the last ten years, the rate of violence has increased from 863 victims to 1,086 per 100,000.

Assaults have been on an upward trend since 2022 - both in volume and rate. Typically, common assaults account for almost two-thirds of all assaults. In 2025, there was a slight increase in the severity of assaults (assault with weapon and aggravated assault). Analysis shows that ~50% of assaults occurred in Districts 1 (Beltline & Downtown Core), 4 (Forest Lawn), and 5 (Saddleridge). Between 2023-2025, roughly one in three victims were assaulted by a stranger.

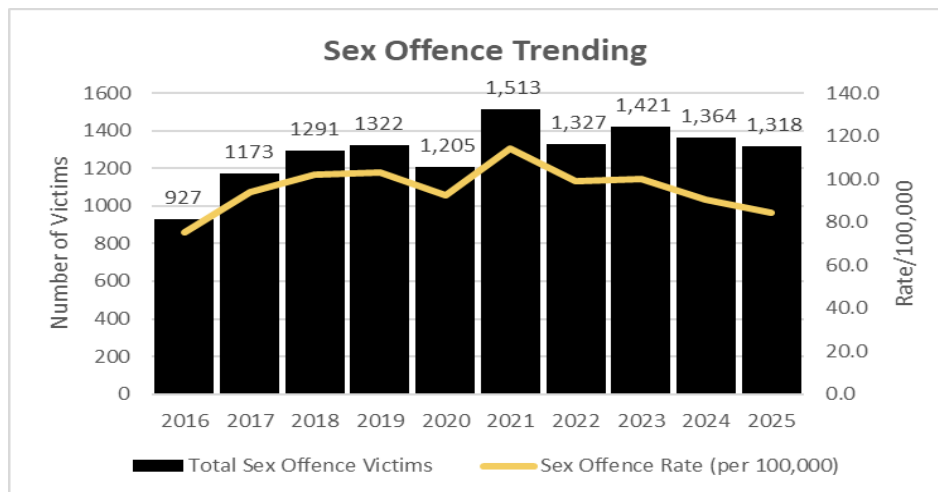

There was a 6% (n=69) decrease in the number of robberies in 2025 compared to 2024 and it was on par with the five-year average. Over the last ten years, the overall robbery rate has remained stable at 67 robberies per 100,000 with its peak in 2019 at 89 robberies per 100,000. Person robberies (subset of

<sup>4</sup> Violence is counted by the number of victims, whereas property crime is counted by the number of incidents.

robbery) saw a very slight increase (n=13) compared to 2024 and 10% (n=67) increase over the five-year average.

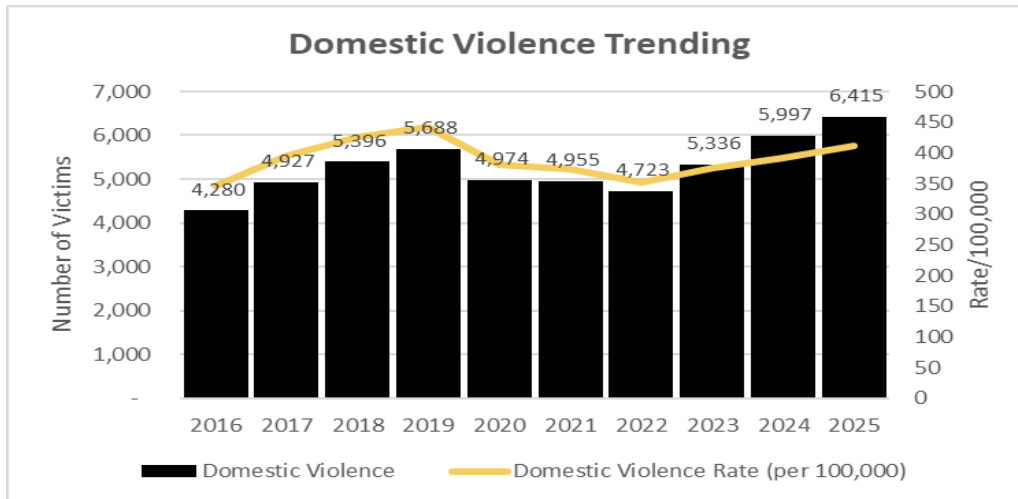

The number and rate of sex offences has been on the decline since 2021. There was a 3% (n=46) decrease in 2025 compared to 2024, and a 4% (n=55) compared to the five-year average. The severity of assaults has remained stable over the last three years with assault with a weapon and aggravated assault accounting for ~5% of all sex offences.

## Domestic Incidents

Domestic violence has been trending up since 2022. In 2025 there was a 7% (n=418) increase in the number of people who experienced domestic violence compared to last year, and 22% (n=1,170) compared to the five-year average. Common assaults account for 55% (n=3,541) of all domestic violence followed by assaults with weapon/causing bodily harm (physical force is most used) accounting for 21% (n=1,361). There was a 33% (339) increase in assaults with a weapon in 2025 compared to the five-year average. The rate of domestic violence has increased over the last ten years, from 347 victims per 100,000 compared to 411 in 2025.

Typically, there is an inverse relationship between domestic violence and non-criminal incidents: when one increases, the other decreases. 2025 does not appear to hold true to this pattern, as both criminal (violence) and non-criminal incidents (calls for service where the incident does not meet the criminal threshold) have increased. In 2025, non-criminal domestic incidents increased by 3% (n=390) and 4% (631) compared to the five-year average. The rate of non-criminal domestic incidents was 1,113 in 2016 compared to 1,076 in 2025.

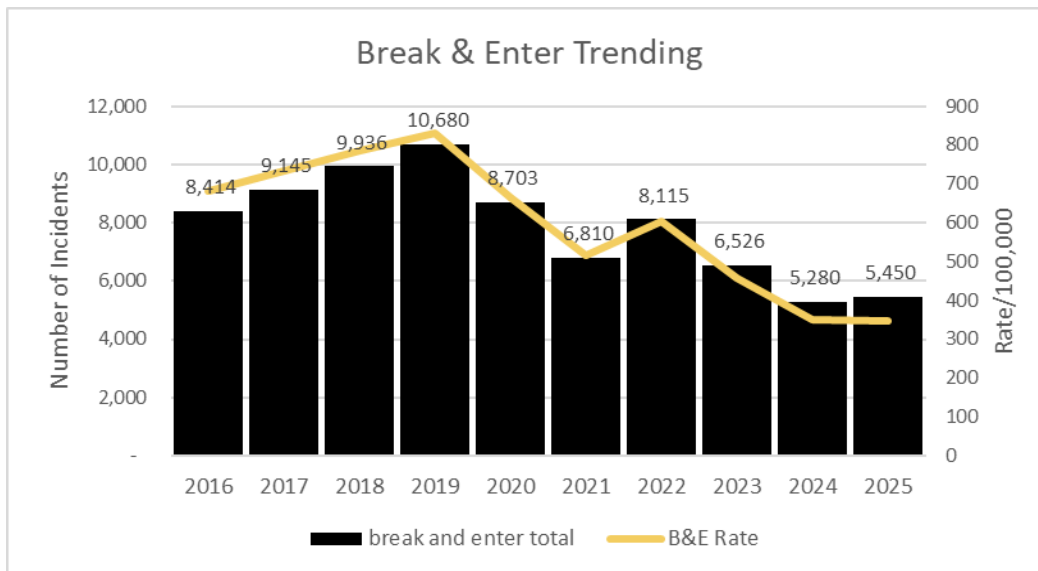

## Property Crime

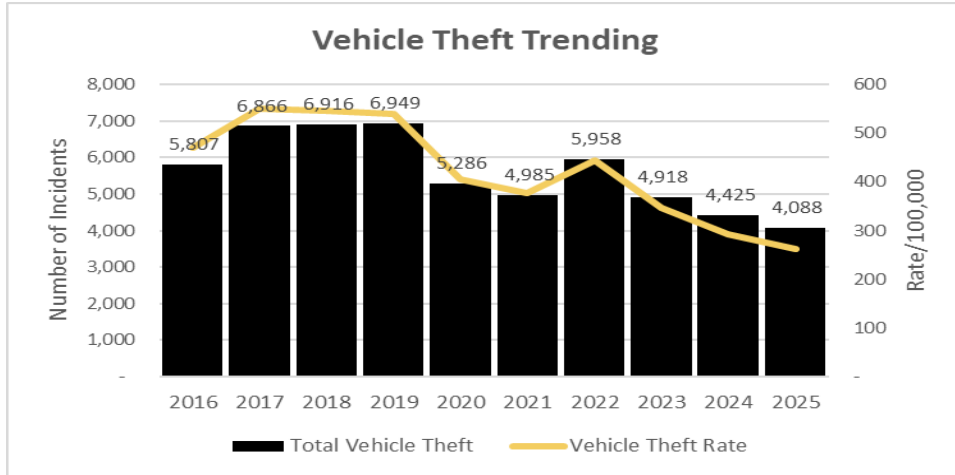

2019 was the peak of property crime in both volume and rate, at 61,786 incidents and 4,086 incidents per 100,000. During Covid, property crimes decreased as the opportunity to commit property crimes was limited with people being at home and fewer cars being parked in lots. 2025 shows a 14% (n=6,562) increase compared to 2024, and 4% increase over the five-year average. The increase is driven by theft and fraud. The property crime rate in 2025 is 3,328 incidents per 100,000 compared to 3,009 in 2024.

Break and Enters (B&Es) are a crime of opportunity and typically occur when residents or business owners are not present. These crimes peaked in 2019 and dropped dramatically with the onset of Covid restrictions. Commercial B&Es began increasing in 2022 and concerted police efforts led to the subsequent decline. In 2016, there were 681 B&Es per 100,000 and in 2025 it has dropped to 349 incidents.

Vehicle thefts show similar trending to B&Es. From 2017-2019, vehicle thefts reached ten-year highs and were often associated to increases in acquisitive crimes, organized crime, and methamphetamines. The number of incidents decreased by 8% (n=337) compared to 2024, and 20% (n=1,027) compared to the five-year average.

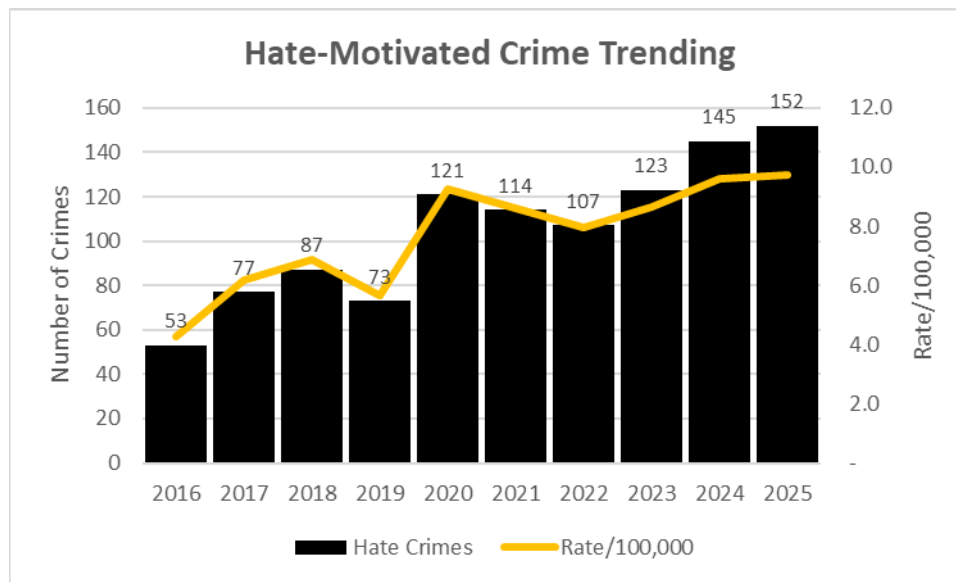

The increases in the 2025 incidents is attributed to online reporting for shoplifting incidents. Efforts to streamline the reporting process for loss prevention officers have been embraced as evidenced by the large (n=~4,800) increase in shoplifting incidents (theft under & over) compared to 2024 and doubled (n=6,705) compared to the five-year average. Theft under incidents not associated to shoplifting also increased by 15% (n=995) and 18% (n=1,080) over the five-year average. The rate of theft per 100,000 has decreased over the last ten years, 3,328 in 2025 compared to 4,132 in 2016.

## Hate-Motivated Crime <sup>5</sup>

Hate-motivated crime has been increasing since 2019 and geopolitical unrest has led to increases in Calgary and throughout Canada. In 2025, hate-motivated crimes increased by 5% (n=7) compared to 2024, and 25% (n=30) compared to the five-year average. Most of these crimes relate to property crimes (i.e., mischief to property). Race/Ethnicity and Religion are the most frequent motivations for these crimes. The rate of hate crime over the last ten years has increased from 4.3 incidents per 100,000 in 2016 compared to 9.7 incidents in 2025.

## Conclusion

Calgary's call and crime trends are regularly monitored by CPS to assess the demands of policing, inform supports for crime issues, and to inform strategic and business planning.

<sup>5</sup> A deeper examination of Hate Crimes will be available when Statistics Canada releases their annual statistics in the spring.

# Call & Crime Trending 2025 Highlights

Rebecca Davidson, Manager  
Corporate Data & Analytics

2026 March 25

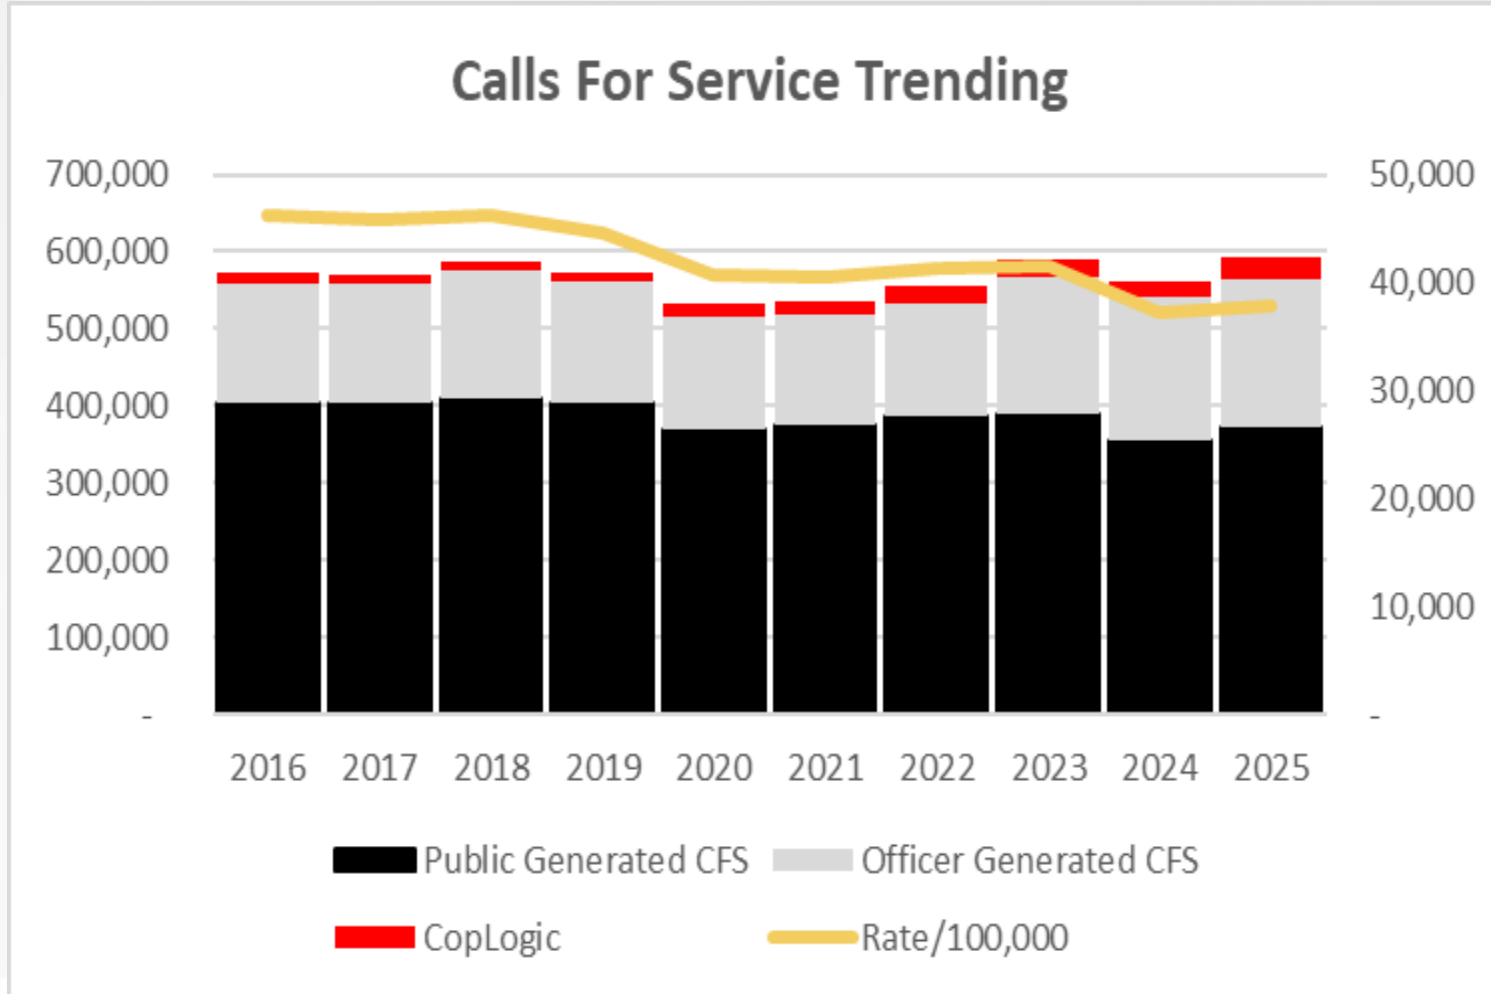

# Context

The CPS is committed to Call and Crime reporting

- Monthly updates at CPC
- Monthly dashboard updates on our Calgary Police Service website
- Annual public reporting
- Statistics Canada July release of all police-reported crime statistics for all police jurisdictions

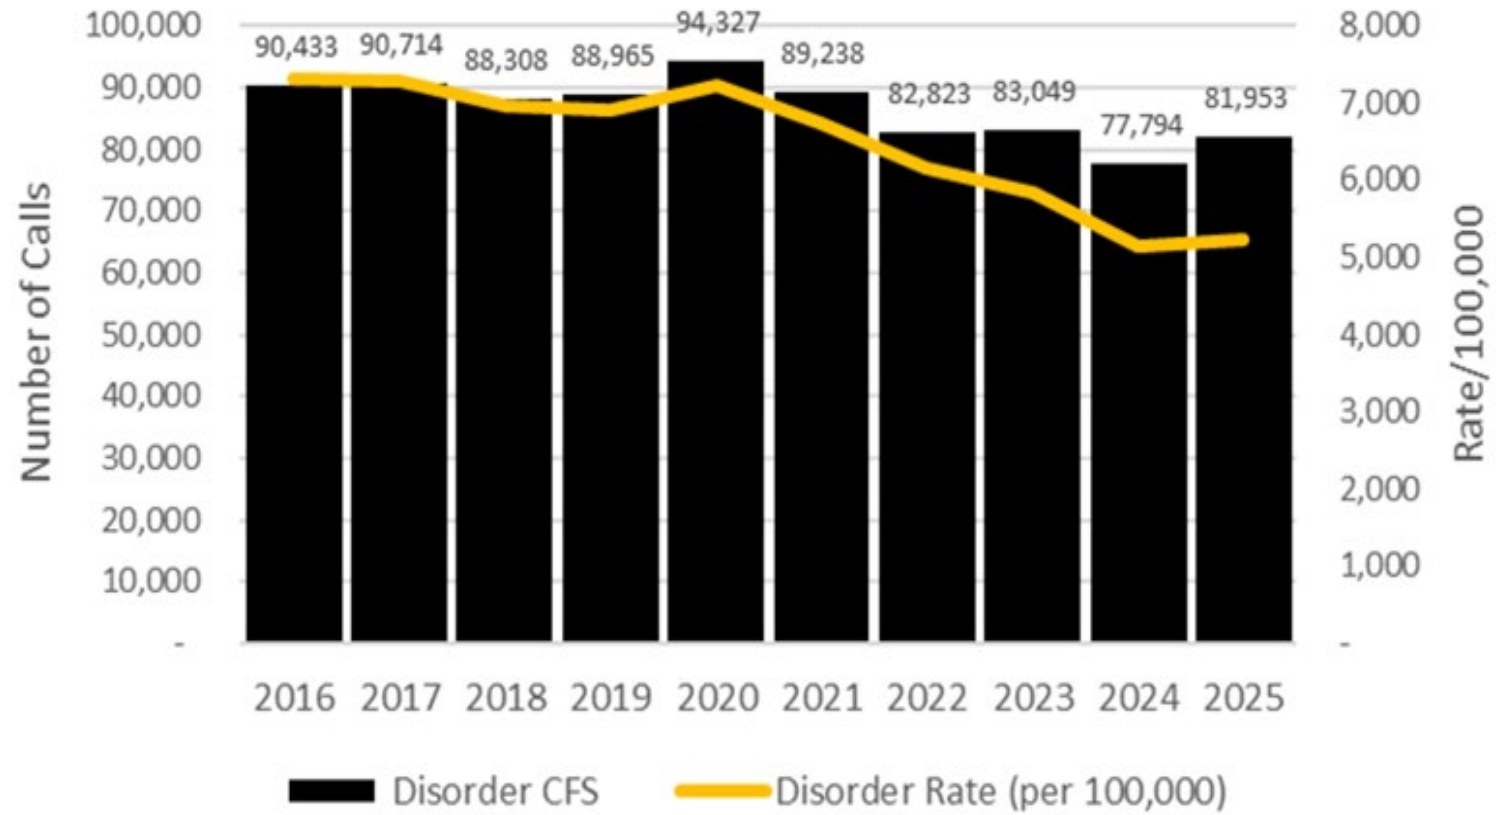

On average, there are 1,021 publicly-generated CFS per day

29% increase in online reporting from 2024 – driven by an increase in theft reporting

## Publicly Generated Disorder Calls Trending

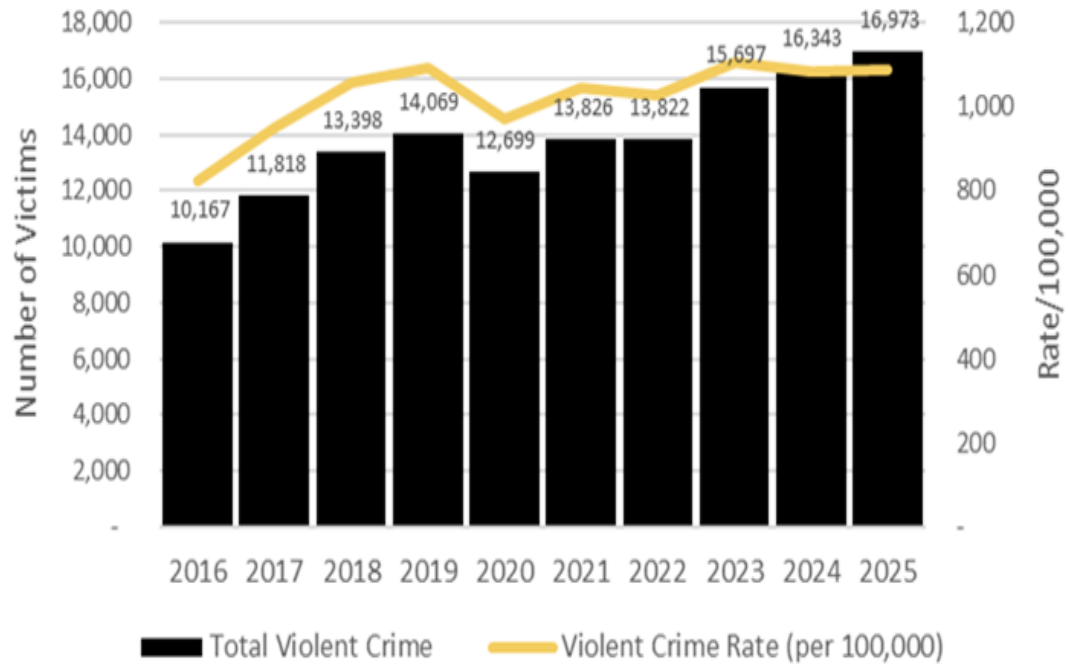

Top Calls:  
 Unwanted Guests  
 Suspicious Person  
 Disturbances

On average day, there are  
 224 disorder related calls

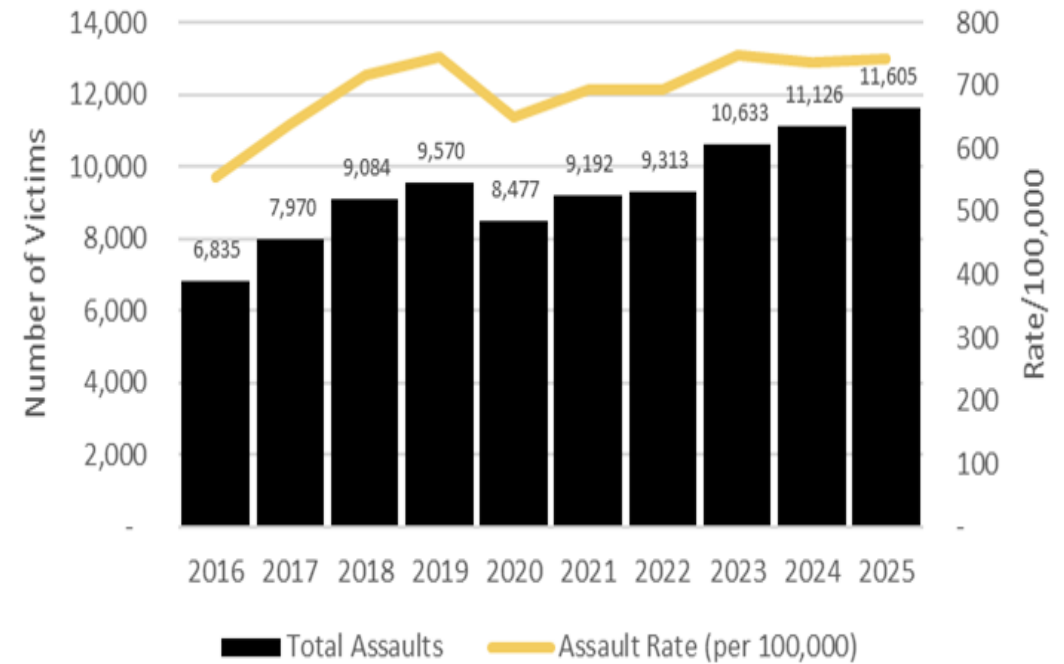

### Violent Crime Trending

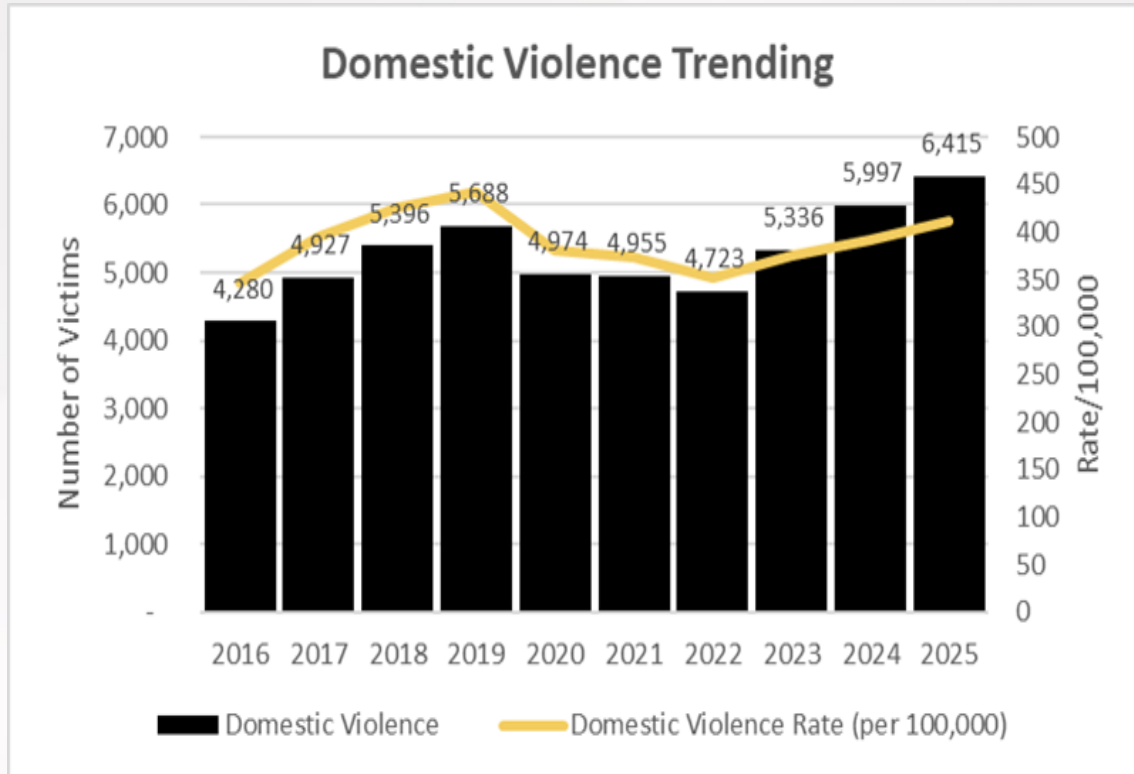

16% increase in violent crime compared to the five-year average

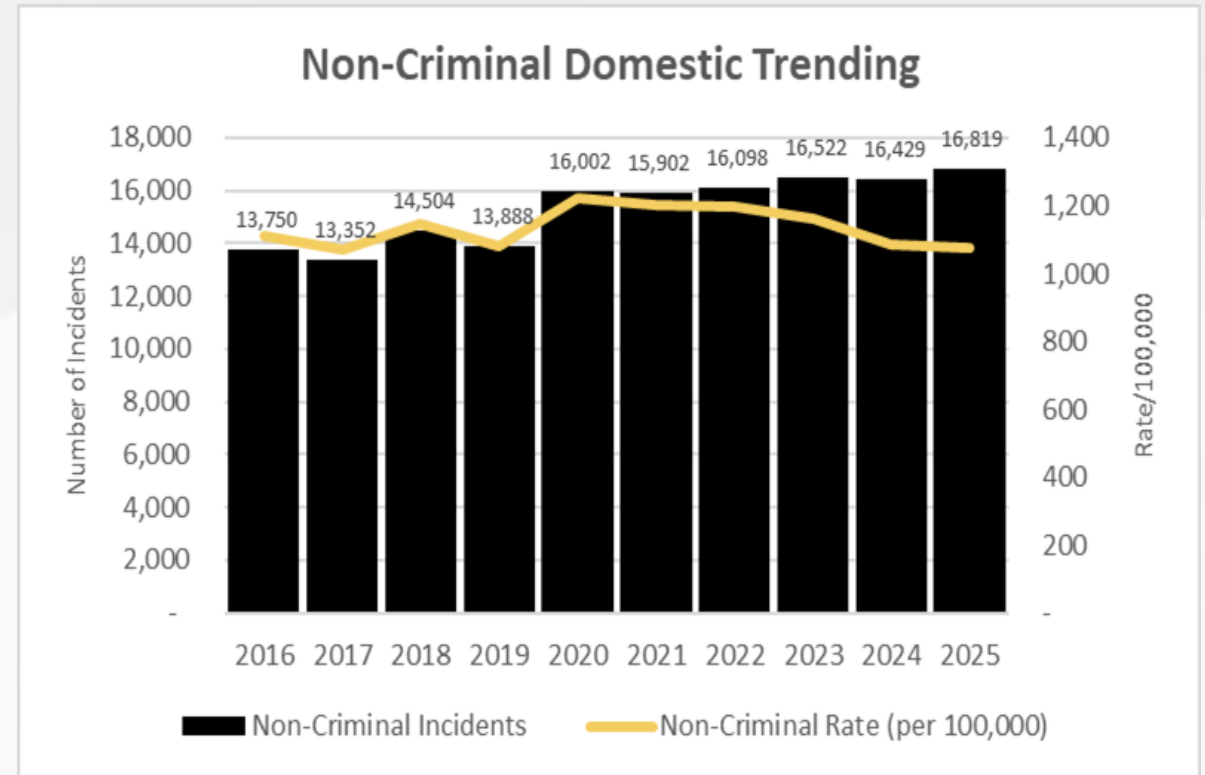

### Assault Trending

Common assaults account for 62% of all assaults

Domestic violence has increased by 22% compared to the five-year average

The rate of domestic incidents that did NOT meet the criminal threshold decreased by 3%

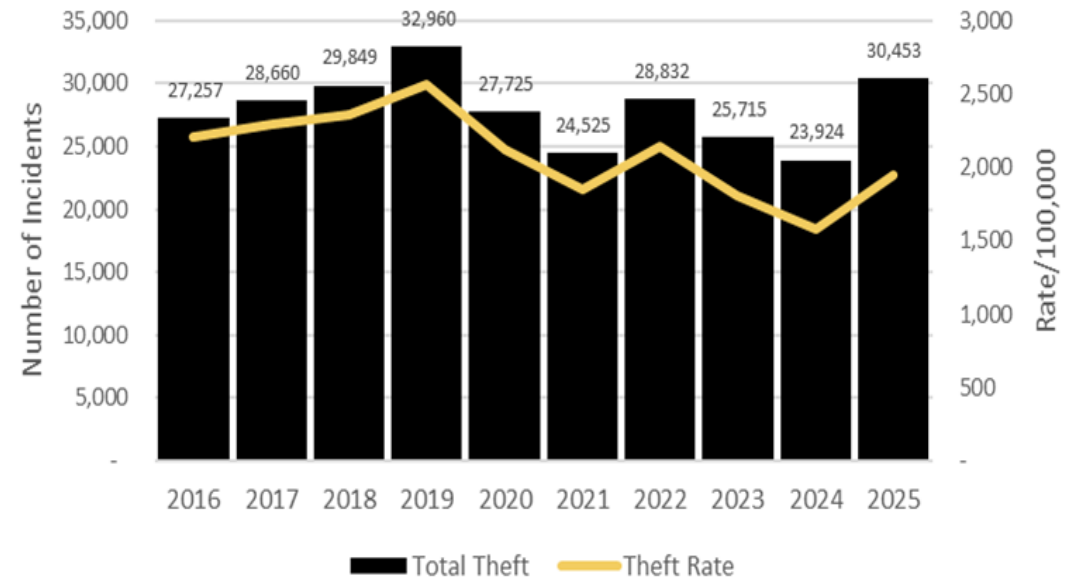

### Property Crime Trending

Property crimes  
increased by 14%

### Theft Trending

Thefts account for ~60%  
of all thefts

# How is this information used at CPS?

- Assess the demands of policing and emerging issues
- Gauge Calgary's trends with other jurisdictions and national picture
- Inform supports for crime victims as well as strategic operational planning
- Data-driven initiatives and assessments
- Inform Annual Policing Plan - KPIs
  - Fostering community safety & wellbeing
  - Build Public trust and confidence
- Transparency and accountability with the community

## Corporate Data & Analytics
